LE INDUSTRY SERVICES

CAPABILITY STATEMENT

2016

Integrated industry based
learning and engineering
support services

>>MISSION STATEMENT

To improve industry performance by providing an integrated, cost effective service that assists in the creation of a competent workforce.

>>OBJECTIVES

- To integrate our skills and services with our clients' needs.
- To continually develop our products through peer review and research.
- To value add to the clients' existing skill base.
- To keep up to date with and incorporate the best practices into our services.

Engineering objectives

- To provide work that is accurate, completed on schedule and within budget.
- To become a leader in technical support for industry.
- To investigate all possible options for the client.

Training objectives

- To provide on-the-job training wherever possible.
- To deliver contemporary training packages in line with current technologies.
- To have content and delivery that is succinct, relevant and useful.

>>LE INDUSTRY SERVICES

Based in the Latrobe Valley, the industrial heartland of Victoria, LE Industry Services provides services to projects state-wide, nationally and overseas. We service clients from a broad industrial spectrum, including the mining, power, gas and manufacturing industries.

Our overarching aim is to raise industry standards by providing training and technical support that is relevant to individual work environments and which fully integrate with our client's needs.

Our key strength lies in our ability to supply expertise that value adds to a client's existing skills and operations in an efficient and cost effective manner.

Recognising the need to maintain and develop skills to world's best practice, LE Industry Services is a Registered Training Organisation (RTO) and offers government accredited courses, and other short courses linked to national training packages and competencies. Moreover our flexible and creative team can provide alternative or additional educational packages upon request that have been exclusively designed for each client's particular situation.

We provide a wide range of commissioning, electrical, instrumentation and mechanical services to industry in the form of consultancy services and quality technical support. These services include scoping, construction, testing and inspection and project close out.

>> INDUSTRY BASED LEARNING

Training and Assessment Services

Accredited Training Packages

- RII** Resources and Infrastructure Industry
- UEE** Electrotechnology
- CPC** Construction, Plumbing and Services
- TAE** Training and Education

Qualifications

- Certificate II Technical Support
- Certificate III Instrumentation and Control
- Certificate IV in Electrical Instrumentation
- Certificate IV in Instrumentation and Control

Accredited Training

- Workplace Assessor
- Confined Space Entry
- Programmable Logic Controllers (PLC)
- Hazardous Area Wiring
- Work Safely at Heights

High Risk Licences

- Elevated Work Platform
- Forklift

VOC

- Verification of Competency for Plant

Safety Training

- Health and Safety Training
- Earth Moving Equipment
- Permit to Work (LOTO)
- Electrical Safety for non-electricians
- Hazard Identification
- Hazardous Substances and Dangerous Goods
- Manual Handling

Training Support Services

- Skills Gap Analysis
- Provision of Client Training Plans
- Training Needs Analyses

Interpersonal skills

- Communication
- Effective Coaching Skills
- Mentor Training
- Problem Solving
- Time Management
- Audit Training
- Conflict Resolution
- Team Building
- Employability Skills
